

New Features In Drupal 10.3.0

Drupal 10.3.0 Is A Minor Release

- This is a minor release and so should not break backwards compatibility.
- You should still test your sites though!

Navigation

Navigation Modules

New experimental navigation modules.

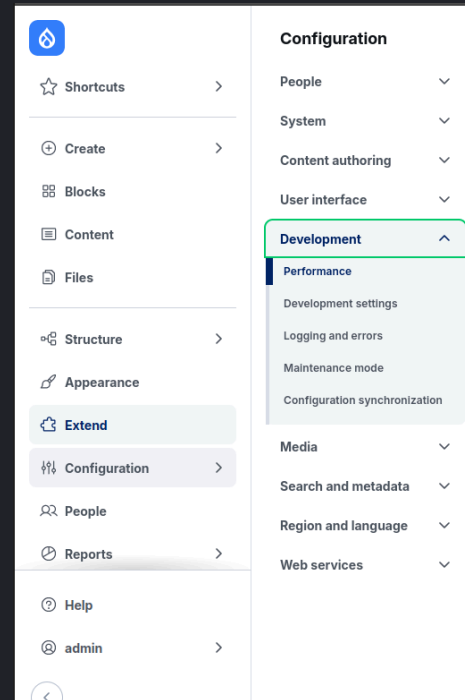

^ Core (Experimental)	
<input checked="" type="checkbox"/> Navigation	<div><div>^ New administration navigation</div><div>Machine name: navigation Version: 10.3.1 Requires: Block, File, Field, Layout Builder (disabled), Layout Discovery (disabled), Contextual Links Required by: Navigation Top Bar (disabled)</div></div>
<input checked="" type="checkbox"/> Navigation Top Bar	<div><div>^ When enabled, this module provides relevant administrative information and tasks for the current page on a top bar. It is not feature complete nor fully functional so enabling it could lead to possible inconsistencies.</div><div>Machine name: navigation_top_bar Version: 10.3.1 Requires: Navigation (disabled), Block, File, Field, Layout Builder (disabled), Layout Discovery (disabled), Contextual Links</div></div>

Navigation Top Bar has some bugs currently.

Navigation Modules

Typical Drupal customisation options are available.

Menu Link Interface

Options moved into the right menu.

Home > Administration > Structure > Menus

Edit menu link ☆

Menu link title *

The text to be used for this link in the menu.

Link *

• The location this menu link points to.
• Start typing the title of a piece of content to select it. You can also enter an internal path such as `/node/add` or an external URL such as `https://example.com`. Enter `<front>` to link to the front page. Enter `<nolink>` to display link text only. Enter `<button>` to display keyboard-accessible link text only.

☒ **Enabled**
A flag for whether the link should be enabled in menus or hidden.

[Save](#) [Delete](#)

Parent link

<Main navigation> ▾

The maximum depth for a link and all its children is fixed. Some menu links may not be available as parents if selecting them would exceed this limit.

[^ Display settings](#)

Weight

Link weight among links in the same menu at the same depth. In the menu, the links with high weight will sink and links with a low weight will be positioned nearer the top.

☐ **Show as expanded**
If selected and this menu link has children, the menu will always appear expanded. This option may be overridden for the entire menu tree when placing a menu block.

[^ Description](#)

Description

Taxonomy Revisions

Now usable.

Home > Cake
